Permit Number:

In the absence of any New Jersey Department of Environmental Protection (NJDEP) permits / approvals, I swear and certify the only marine construction submitted to Little Egg Harbor Township for approval is for the repair or replacement of existing marine construction.

This is to Certify, that all work, materials, and all other requirements are strictly in compliance with LEHT ordinance chapter 151 Bulkhead Construction in its entirety. Only work approved by the township engineer is to be conducted; nothing more. All Materials must be inspected and passed before any work can start. If more work than originally submitted is required you are acknowledging you are aware that you will need to submit a new bulkhead plan and check payment to cover our engineer cost to review the new plan for approval (\$300). The new plan must have engineer approval and all materials must be inspected and approved BEFORE any work can begin.

Failure to adhere to these rules and the laws set forth in our ordinance may subject the owner and / or contractor to penalties set forth in chapter 151 Bulkhead Construction.

Subscribed and sworn to before me on this \_\_\_\_\_
